Company Profile

Oil & Gas

OIL & GAS

ProMIS has improved its skills especially in the automation of oil (petroleum) and natural gas plants owing to the broad experience it has gained in the field of industrial automation for long years.

ProMIS Oil and Gas Group carries out its activities in the following 3 main fields :

Natural Gas Regulating and Metering Stations (RMS)

Natural Gas Odorization Systems

Oil Truck Loading Stations

Having concentrated on the automation of natural gas RMS and the odorization of odorless natural gas since 2003, ProMIS successfully delivered more than 100 projects nationwide.

ProMIS, which successfully provides the design, installation, start-up and maintenance services of natural gas RMS in accordance with turn-key basis, engages in the sales and distribution of regulators, valves and flow computer units used in this field.

Having started to produce odorization units as well, ProMIS is the leading company of Turkey in this field and especially in the export and sales of odorants.

Another area of expertise of ProMIS Oil and Gas Group is the automation of oil truck loading stations. The design, production, assembly, testing, start-up and maintenance services of all components needed in a oil truck loading station such as; crude oil tanks, tanker filling equipment, fire prevention system, canopies, electrical system, automation equipment system are provided.

ENERGY

The activities in the field of energy which ProMIS has been carrying out since 1999 focus on the establishment of turn-key Hydro Electric Power Plants (HEPP); several projects of different capacities have been successfully put into use.

Having carefully examined the performance factors of HEPP projects which have become very popular especially in recent years, ProMIS has determined its line to be only designing and putting into use turn-key projects. ProMIS, which believes that all responsibilities should be brought together under the roof of a single company for high-quality and high-performance projects, does not prefer to be involved in HEPP projects as a contractor although it has specialized in automation and electricity projects.

Having strengthened its profound knowledge in industrial automation with the skills developed in hydroelectric power plants in the course of time, ProMIS has determined the capacity of its experienced and qualified engineering team to be 5-6 HEPP projects in a year for the purpose of making no concessions on quality and performance. ProMIS Energy Group designs and supplies all of the following main components of a HEPP.

Hydraulic Turbines | Generators and Electrical Installation

Hydro-Mechanical Systems | Generator and Turbine Regulators

Pressure Sets | Lubrication, Drainage and Cooling Systems

Automation Units | Remote Control and Maintenance Systems

In new projects, optimum installation dimensions are analyzed and fixed investment cost is determined following feasibility and profitability studies. Fixed-price system offer which is provided in accordance with turn-key basis includes project management, basic and detailed engineering and the supply-installation-start-up of all devices and installations.

Energy

INDUSTRIAL AUTOMATION

Having systematically specialized in industrial automation since the day it was established, ProMIS develops solutions to the needs of many establishments from various sectors and provides consultancy services.

These services which are designed and offered by ProMIS engineers who are specialists in telemetry, communication, energy, automation and electrical engineering comprise of solutions that comply with industrial standards, are independent of contractors, use state-of-the-art and consistent technologies, prioritize system functions and productivity.

By selecting and using the most suitable SCADA, PLC, RTU, DCS, hybrid systems and products for the structures of the projects it prepares, ProMIS Industrial Automation Group provides automation solutions for every kind of application areas, especially in the following.

- Natural Gas Regulating and Metering Stations (RMS)**
- Hydro Electric Power Plants (HEPP)**
- Oil Truck Loading Stations**
- Machine Efficiency Monitoring and Control Systems**
- Powder Material Conveyor Systems**

ProMIS meticulously plans the detailed design, device programming, installation and start-up stages of the system solutions it creates in accordance with turn-key basis, follows them on the base of the project management principles it has developed and shares all developments in the project plan with its customers within the framework of a transparent structure.

BUSINESS SOFTWARE

In 2007, ProMIS reorganized the experience it had acquired in software development and project management for long years within a more organized structure and started to develop management software for the needs of business world.

Having been developed by ProMIS Business Software Group and put on the market at the beginning of 2009, ProMIS BMP is a user-friendly internet based Business Management Platform designed to fulfill all management needs of every kind of establishments.

ProMIS BMP, which enables work, communication, collaboration operations between customers, suppliers, employees to be conducted and managed within a single structure, is a user-friendly, coherent and modern integrated business management software that can be easily accessed via internet by all employees in the office, construction site and field, is capable of performing time and finance follow-up on the base of work and project, and features all software functions needed by establishments.

Thanks to ProMIS BMP, which was designed and developed by Turkish engineers in METU (Middle East Technical University) Technopark and is offered together with user's warranty and training-consultancy services provided by consultants having real business life experience, establishments attain a systematic company management structure with a corporate memory and are capable of managing their business and projects in a better and easier manner. ProMIS BMP comprises of the following modules.

- Office Management | Time Management | CRM | Inventory Management**
- Sales Management | Project Management | Purchasing Management**
- Service Management | Production Management | Documentation Management**
- Finance and Accounting Management | Reports | System Settings**

Industrial Automation

Business Software

ABOUT US

ProMIS Process Control and Management IT Systems Ltd. was founded as a result of a merger between Vamego Industrial Products Trade Ltd. (1986) and Prokom Process Control and Computer Technology Ltd. (1989) in 1994.

Having specialized in industrial automation and software, ProMIS started to operate in establishment of power plants in 1999.

Having made agreements with foreign finance organizations as of March, 1999, ProMIS has provided its customers with finance credits for their projects under favorable conditions and managed to reach an ambitious position.

ProMIS, which has built the systems of odorization, electricity and automation for more than 100 Natural Gas Regulating and Metering Stations (RMS) nationwide since 2003, is the leading company of Turkey in the odorization of odorless natural gas and the supply of odorants.

Having concentrated on the field of software since 2007, ProMIS started to develop its product ProMIS BMP (Business Management Platform) in the light of the knowledge acquired in project management for long years. ProMIS BMP, which has been on the market as of the beginning of 2009, filled a huge gap in the field of integrated business management software thanks to its ever-growing structure and features.

ProMIS Ltd. carries out its business activities in Ankara and Istanbul on the base of Oil and Gas, Energy, Industrial Automation and Business Software business units.

Having put its signature under high-quality projects, ProMIS cooperates with system integrators as well.
